

Call Point

A fire alarm call point or manual call point, provides an opportunity to manually raise the alarm in the event of a fire. The button, which is usually placed behind breakable glass, is pushed transmitting a fire signal manually to Control panel, raising the alarm and so alerting everyone in the building.

SKUs	Need to create new SKUs	
KFI Type Approval	발94-16-2	
Type	Conventional	
Rated Input Voltage	DC24V±20%	
Operating current	Max. 1A	
Environment	Temperature	-10°C ~ 50°C
	Humid	0% ~ 95%
Size (mm)	144Ø x 19.5D	
Size (mm)	Approx. 330g	
Material	PC (Poly Carbonate)	
Color	Red
