

Releasing Indicating Lamp

The releasing indicating lamp is an important alarm device to indicate that the fire extinguishing system is working in the event of a fire.

When the discharge indicator is on, the GAS release area is kept closed until the digestive medicine is fully released to prevent human damage.

This device has a function of visually informing the situation in which digestive medicine is being released.

These warnings lead to rapid evacuation in the event of a fire and contribute to minimizing casualties.

SKUs	Need to create new SKUs	
Type	Conventional, Indoor	
Rated Input Voltage	DC24V±20%	
Operating current	LED, Max. 100mA	
Environment	Temperature	-10°C ~ 50°C
	Humid	0% ~ 95%
Size (mm)	322 x 115 x 42	
Weight (kg)	Approx. 1.83 kg	
Material	Body - PC (Poly Carbonate) Display - Acrylic	
Color	Red
